## PROFILE

I am constantly improving myself in web development. On the backend, I work with Spring Boot and .NET Core technologies, while also developing projects on the frontend. I have experience in microservices architecture, RESTful APIs, Feign Client, and database management. Additionally, I contribute to open-source projects on GitHub and work on API integrations. I am passionate about learning new technologies, problem-solving, and creating efficient software solutions.

## SKILLS

- Backend Development
- Frontend Development
- Microservices Architecture
- Database Management
- API Integration
- Version Control
- Development Tools
